

# TRAE IMPLEMENTATION PACKAGE

Luis Gilberto Immersive Portfolio Experience

Complete handoff with assets, code, and specifications

CRITICAL FIRST IMPRESSION

Scroll animation must be perfect

## Quick Implementation Overview

### 1. Immersive Scroll

8 portfolio images zoom/fade on scroll

### 2. Mood Selector

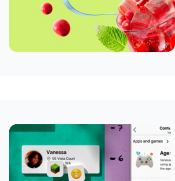

3 audience tracks with content reordering

### 3. Adaptive Content

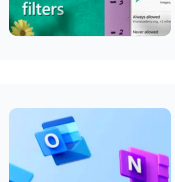

Page sections reorder based on selection

## Portfolio Images - Ready for Implementation

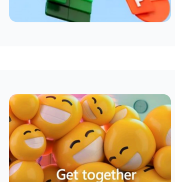

### Image Assets (All Optimized for Web)

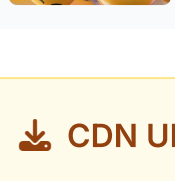

**AI Browsing Campaign**  
Position: Top-left | Max Scale: 4x  
portfolio\_ai\_browsing.jpg

**Family Safety Campaign**  
Position: Top-right | Max Scale: 6x  
portfolio\_fsa\_consumer\_launch\_400x400.jpg

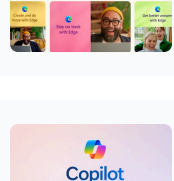

**Free to Be Free Campaign**  
Position: Bottom-left | Max Scale: 8x  
portfolio\_free2bfree\_400x400.jpg

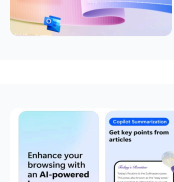

**Teams Get Together**  
Position: Bottom-right | Max Scale: 9x  
portfolio\_teams\_400x400.jpg

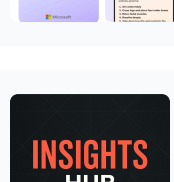

### Additional Campaign Assets

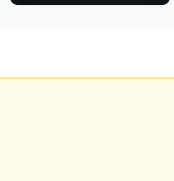

**Edge-ucational Series**  
Position: Center-left | Max Scale: 7x  
portfolio\_edge\_ucational\_hero\_400x400.jpg

**Copilot M365 Announcement**  
Position: Bottom-center | Max Scale: 6x  
portfolio\_free2bfree\_bounce\_influenced\_copilotm365\_400x400.jpg

**Edge App Store Redesign**  
Position: Bottom-right | Max Scale: 6x  
portfolio\_edge\_app\_store\_400x400.jpg

**Insights Portal**  
Position: Center | Max Scale: 7x  
portfolio\_lg\_insights\_hub.jpg

### CDN URLs Ready for Production

All images are already optimized and hosted on CDN. Replace the URLs in the implementation code with your final hosting URLs.

## Brand Guidelines & Design Tokens

### Color Palette

**Coral (Primary)**  
#F96F6E

**Charcoal (Dark)**  
#0E0E0E

**Warm White**  
#FDFCFB

### Typography

#### Editorial Headlines

Recoleta / Editorial New  
For main headlines and hero text

#### Body & Interface

General Sans / Inter fallback  
For UI elements and body text

### Class Morphism

Glass Background  
rgba(255, 255, 255, .04)

Border  
rgba(255, 255, 255, .12)

Backdrop Filter  
blur(20px)

## Complete Implementation Code

### HTML Structure

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Luis Gilberto - Portfolio</title>
  <style>
    :root {
      --coral: #F96F6E;
      --charcoal: #0E0E0E;
      --warm-white: #FDFCFB;
      --glass-bg: rgba(255, 255, 255, .04);
      --glass-border: rgba(255, 255, 255, .12);
    }
  </style>
</head>
<body>
  <!-- Immersive Hero Section -->
  <section id="ImmersiveHero">
    <div class="hero_sticky">
      <!-- Portfolio Images -->
      

      
    </div>
    <!-- Content Endcap -->
    <div class="hero_endcap">
      <h1>Creative Leadership Through Innovation</h1>
      <div class="hero_cta">
        <a href="#selector" class="btn btn--primary">Explore Projects</a>
        <a href="#timeline" class="btn btn--ghost">View Timeline</a>
      </div>
    </div>
  </section>

  <!-- Mood Selector -->
  <section class="selector" id="trackSelector">
    <div class="selector_inner">
      <h2>How do you want to enter my world today?</h2>
      <p>Pick your mood—your journey will adapt.</p>

      <div class="selector_grid">
        <button class="selector_card" data-track="recruiter">
          <div class="selector_icon">👤</div>
          <h3>Professional Impact</h3>
          <p>Crystal-clear wins. Leadership, scope, outcomes.</p>
        </button>

        <button class="selector_card" data-track="partner">
          <div class="selector_icon">❤️</div>
          <h3>Collaboration & Ideas</h3>
          <p>Co-create the moment. Strategy, creative, execution.</p>
        </button>

        <button class="selector_card" data-track="inspiration">
          <div class="selector_icon">🎨</div>
          <h3>Play & Inspirations</h3>
          <p>Start with visuals. Stories, process, fun bits.</p>
        </button>
      </div>
    </div>
  </section>

  <!-- Adaptive Content Sections -->
  <main id="pageContent">
    <section data-section="projects"><h2>Projects</h2></section>
    <section data-section="timeline"><h2>Timeline</h2></section>
    <section data-section="how"><h2>How I Work</h2></section>
    <section data-section="essays"><h2>Essays</h2></section>
    <section data-section="contact"><h2>Contact</h2></section>
  </main>
</body>
</html>
```

### Critical CSS (Immersive Scroll)

```
#ImmersiveHero {
  position: relative;
  min-height: 250vh;
  background: #000;
}

.hero_sticky {
  position: sticky;
  top: 0;
  height: 100vh;
  overflow: hidden;
}

.hero_img {
  position: absolute;
  left: var(--x, 50%);
  top: var(--y, 50%);
  transform: translate(-50%, -50%) scale(var(--scale, 1));
  width: min(28vw, 520px);
  height: auto;
  opacity: var(--alpha, 1);
  will-change: transform, opacity;
  pointer-events: none;
  filter: contrast(1.04) saturate(1.06);
}

.hero_endcap {
  position: absolute;
  inset: auto 0 12vh 0;
  z-index: 5;
  display: grid;
  place-items: center;
  gap: 1rem;
  transform: scale(var(--endScale, 0.8));
  opacity: var(--endAlpha, 0);
}
```

### JavaScript Animation Engine

```
function initImmersive() {
  const hero = document.getElementById('ImmersiveHero');
  if (!hero) return;

  const imgs = hero.querySelectorAll('.hero_img');
  const endcap = hero.querySelector('.hero_endcap');

  function onScroll() {
    const rect = hero.getBoundingClientRect();
    const vh = window.innerHeight;
    const end = rect.height - vh;
    const progress = Math.max(0, Math.min(1, (vh - rect.top) / (end || 1)));

    // Animate images
    imgs.forEach(img => {
      const maxScale = parseFloat(getComputedStyle(img).getPropertyValue('--maxScale')) || 6;
      const scale = 1 + progress * (maxScale - 1);
      const alpha = 1 - progress * 1.1;

      img.style.setProperty('--scale', scale.toFixed(3));
      img.style.setProperty('--alpha', Math.max(0, alpha).toFixed(3));
    });

    // Animate endcap
    const endStart = 0.8;
    const endProgress = Math.max(0, (progress - endStart) / (1 - endStart));
    endcap.style.setProperty('--endScale', (0.8 + 0.2 * endProgress).toFixed(3));
    endcap.style.setProperty('--endAlpha', endProgress.toFixed(3));
  }

  window.addEventListener('scroll', onScroll, { passive: true });
  onScroll();
}

// Mood selector functionality
const TRACK_ORDERS = {
  recruiter: ['timeline', 'projects', 'how', 'essays', 'contact'],
  partner: ['projects', 'how', 'timeline', 'essays', 'contact'],
  inspiration: ['projects', 'essays', 'timeline', 'how', 'contact']
};

function applyTrack(track) {
  const content = document.getElementById('pageContent');
  const sections = [];

  [...content.children].forEach(sec => {
    sections[sec.dataset.section] = sec;
  });

  TRACK_ORDERS[track].forEach(key => {
    if (sections[key]) content.appendChild(sections[key]);
  });

  localStorage.setItem('lg_track', track);
}

// Initialize
document.addEventListener('DOMContentLoaded', () => {
  initImmersive();

  document.getElementById('trackSelector').addEventListener('click', (e) => {
    const card = e.target.closest('.selector_card');
    if (card) applyTrack(card.dataset.track);
  });
});
```

## Step-by-Step Implementation Guide

### 1. Replace Image URLs

Update all [IMAGE\_URL] placeholders with the actual CDN URLs:

```
[AI_BROWSING_URL] -> https://cdn1.genspark.ai/user-upload-image/jupyter/tooluse_fQZUzTmNQzy-bAxOm2RXEQ/output/portfolio_ai_browsing.jpg
[FAMILY_SAFETY_URL] -> https://cdn1.genspark.ai/user-upload-image/jupyter/tooluse_fQZUzTmNQzy-bAxOm2RXEQ/output/portfolio_fsa_consumer_launch_400x400.jpg
...and so on for all 8 images
```

### 2. Test Scroll Animation

Load the page and verify:

- Images appear at correct positions on load
- Smooth scaling starts immediately on scroll
- Different zoom rates (4x, 6x, 8x, 9x) create variety
- Images fade out as content appears

### 3. Implement Brand Fonts

Add proper font loading:

```
<link href="https://fonts.googleapis.com/css2?family=Recoleta:wght@300;400;500;600&display=swap" rel="stylesheet">
```

### 4. Test Mood Selector

Verify all three tracks work:

- Professional Impact:** Timeline -> Projects -> How -> Essays -> Contact
- Collaboration & Ideas:** Projects -> How -> Timeline -> Essays -> Contact
- Play & Inspiration:** Projects -> Essays -> Timeline -> How -> Contact

### 5. Cross-Browser Testing

Test on:

|                           |                        |
|---------------------------|------------------------|
| Chrome (Desktop + Mobile) | Safari (Desktop + iOS) |
| Firefox                   | Edge                   |

## Critical Testing Checklist

### Immersive Scroll (CRITICAL)

- ☐ Images load immediately
- ☐ Smooth zoom animation starts on scroll
- ☐ Different scale rates create variety
- ☐ Images fade out properly
- ☐ Content emerges smoothly
- ☐ No janky or jumpy animations

### Mood Selector

- ☐ All three cards are clickable
- ☐ Content reorders correctly
- ☐ Selection persists on refresh
- ☐ Hover effects work smoothly
- ☐ Mobile touch interactions work

## Performance & Accessibility

### Performance Optimizations

- ✓ Images are web-optimized and compressed
- ✓ Scroll animations use 'will-change' and 'transform'
- ✓ Passive scroll listeners for smooth performance
- ✓ CSS custom properties for efficient updates
- i Consider lazy loading for below-fold content

### Accessibility Features

- ✓ Alt text for all portfolio images
- ✓ Keyboard navigation for mood selector
- ✓ Focus indicators on interactive elements
- ✓ Screen reader announcements
- ✓ Respects "prefers-reduced-motion"

## Implementation Support

If you run into issues:

- Check browser console for JavaScript errors
- Verify all image URLs are accessible
- Test scroll animation on different devices
- Ensure CSS custom properties are supported

Key Success Metrics:

- 🕒 Page load time < 3 seconds
- 📱 Smooth on mobile devices
- 👁️ No visual glitches or jumps
- 👉 All interactions feel responsive

★ Remember: This immersive experience is Luis's competitive advantage. The execution must be flawless to match the sophistication of his Microsoft-level work.
