

Timeline Page — Single Source of Truth (Cards + Modals + Styles + JS)

This document contains everything Trae needs to update the Timeline page in one place: card copy, modal copy, era/date corrections, brand-strip CSS, a new Related Articles section, and a single drop-in JavaScript object. Keep current images/videos. Replace the indicated blocks verbatim.

1) Era Naming & Dates Map (also aligns data-era keys)

Old UI Name	New UI Name	Old Dates	New Dates	Old data-era	New data-era
Foundations	Foundations	2012–2014	2012–2014	foundations	foundations
Ascent	Ascent	2014–2016	2014–2016	ascent	ascent
Expansion	Rewrite	2016–2018	2016–2018	expansion	rewrite
Disruption	Pivot	2018–2020	2019–2020	disruption	pivot
Reinvention	Rise	2020–2022	2020–2023	reinvention	rise
Integration	Reinvention	2022–Present	2023–2025	integration	reinvention

2) Replace DESKTOP Cards (inside #cardsContainer)

Find the six .fs-card children inside and replace with:

```
<div class="fs-card" data-era="foundations" data-media-type="video">
<div class="fs-media">
<video muted loop playsinline preload="metadata"

3) Replace MOBILE Cards (inside .timeline-stack)

```

<div class="fs-card" data-era="foundations" data-media-type="video">
<div class="fs-media">

</div>

```

4) Add 'Related Articles' block to modal (HTML + CSS)

```

<!-- After #modal-brands-supported -->
<div id="modal-related" class="modal-related">
<h4>Related Articles</h4>
<ul class="related-links"></ul>
</div>

```

```

.modal-related { margin-top: 1.75rem; }
.modal-related h4 { color: white; margin-bottom: 0.75rem; font-size: 1.1rem; font-weight: 600; }
.modal-related ul { list-style: none; padding: 0; margin: 0; }
.modal-related li { border-bottom: 1px solid var(--border-color); padding: 0.55rem 0 0.6rem 0; }
.modal-related li:last-child { border-bottom: none; }
.modal-related a { color: var(--text-primary); text-decoration: none; }
.modal-related a:hover { color: var(--coral-red); text-decoration: underline; }

/* Brand strip normalization (logos look the same size regardless of count) */
.brands-supported-image { display: flex; justify-content: center; align-items: center; gap: 1.5rem;
flex-wrap: wrap; padding: 0.5rem 0; }
.brands-supported-image img { max-height: 50px; max-width: 120px; object-fit: contain;
flex-shrink: 0; opacity: 0.95; transition: transform .3s, opacity .3s; }
.brands-supported-image img:hover { transform: scale(1.05); opacity: 1; }

```

5) Replace the entire timelineData object (JS)

```

const timelineData = {

6) Add JS to render Related Articles in openTimelineModal()

```

// After populating brands in openTimelineModal(era):
const relatedSection = document.getElementById('modal-related');
const relatedList = relatedSection?.querySelector('.related-links');

if (relatedSection && relatedList) {
relatedList.innerHTML = '';
if (Array.isArray(data.links) && data.links.length) {
data.links.forEach(item => {
const li = document.createElement('li');
const a = document.createElement('a');
a.href = item.href;
a.target = "_blank";
a.rel = "noopener noreferrer";

```

```
a.textContent = item.label;
li.appendChild(a);
relatedList.appendChild(li);
});
relatedSection.style.display = 'block';
} else {
relatedSection.style.display = 'none';
}
}
```

7) Final Checklist

- Replace desktop & mobile card HTML with the snippets above (era names/dates/blurbs).
- Replace the full timelineData object in JS.
- Insert the 'Related Articles' HTML block and paste the CSS rules.
- Add the Related Articles JS inside openTimelineModal().
- Keep existing media assets as is; we can swap later if needed.
- Verify: cards show updated blurbs; modals show updated quotes/descriptions/achievements; brand logos look consistent; related links appear only when provided.
